Widescreen LCD Television

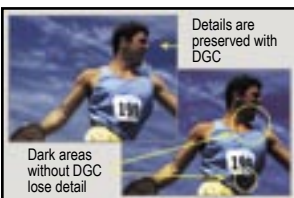

GENESSA

JVC's high definition LCD televisions incorporate Genessa, the world's 1st CPU dedicated to picture processing

High Quality Picture & Sound Features

- **High Resolution Widescreen W-XGA LCD Display (1366 x 768)** – provides high brightness, wide viewing angle, and a flicker-free high resolution widescreen picture
- **4th Generation D.I.S.T. w/Genessa 770p** – JVC's 4th generation D.I.S.T. detects and seamlessly up-scales any video source to display at 770p. New Genessa, the world's 1st CPU dedicated to image processing, provides 32bit "turbo" powered picture processing. The Genessa chip insures faster and more efficient sampling that drastically reduces jagged edges and increases the resolution of any video source
- **ATSC / CableCARD HDTV** – A built-in ATSC tuner allows you to receive over-the-air digital terrestrial broadcasts. The CableCARD slot eliminates the need for a set top box to descramble local cable programming (depending upon cable operator availability)

- **Motion Adaptive Dynamic Gamma Correction (DGC)** – on an area by area basis, JVC's exclusive Motion Adaptive DGC utilizes data from every signal level to insure that tonal gradations are preserved in dark areas making sure images never appear muddled

- **New Smart Picture Technology** – by examining the brightness level of incoming image sources, new Smart Picture technology compensates for scenes, frame by frame, to insure they are displayed at the perfect brightness level without sacrificing contrast and detail
- **New 5 Point Color Management System (CMS)** – expanding upon our exclusive 4 Point CMS, we've added a 5th axis dedicated to flesh tone color sampling. Overall, CMS compensates for color range limitations and insures JVC colors are reproduced with dimension and vivid detail
- **HD Range Digital Super Detail Circuitry (DSD)** – keeps the picture completely focused for both still and highly active images
- **Digital Interface** – includes an HDMI w/HDCP Input, two IEEE 1394 Firewire Ports, a CableCARD slot, and an Optical Digital Audio Output

Notes & Disclaimers

- Specifications are tentative and subject to change without notice.
- Accepts 480i, 480p, 720p, and 1080i signals and displays at 770p.
- BBE is manufactured under license from BBE Sound, Inc.
- HDMI is a trademark of HDMI Licensing L.L.C.
- All images on this sheet are simulated to show effect.
