Quick and easy video editing!

Video editing made easy

Create your own home videos, business presentations, homework projects, and more! It's easy to do with Presto! VideoWorks, a powerful multimedia application that lets you drag-and-drop special effects, text captions, and audio effects. Simply capture a video sequence or still image with a video capture device to get started. You can also combine sequences, add transition effects, and add audio sequences. Producing your own videos has never been easier!

Drag-and-drop effects to save you time

Presto! VideoWorks gives you powerful video editing and enhancing tools at your fingertips. You don't have to memorize commands or follow complicated instructions. Just choose an effect from the Media Browser (complete with effect preview), and drag -and-drop it to the target video file. You can choose your preferred settings for each effect, such as direction and duration. Learning a video editing application has never been easier!

Create professional-quality videos with text, video, and audio special effects

Presto! VideoWorks helps you create the same video and audio effects you see at the movies. You can add headlines, captions, scrolling credits, and more. Presto! VideoWorks allows you to create moving text along a defined path, with different colors and shadow effects. You can also add video special effects such as sphere, swirl, ripple, and mosaic; or audio special effects such as echo, amplitude, and fade in/out.

Video Fun templates help you create video masterpieces

Now that you're created your own home video or presentation, Presto! VideoWorks provides ready-made Video Fun templates to take your

videos further. The Video Fun templates help you create video greeting cards or postcards to share with friends and family. Just drag-and-drop a template to the target video file and Presto! VideoWorks does the rest.

MSRP: \$79.95

Presto! VideoWorks 4.0 Features
