

JOEMEER JM47 TRAKPAK.

The JM47 TrakPak is all that the engineer needs to get a great sound from a location or performance onto any Hard disk, tape, MD, CD or DVD recorder. This is all packed into a carefully fitted aluminium case to give the recording professional less worry about and better results.

The TrakPak combines the amazing new **JM47 Meekrophone** with the industry acclaimed **VC3v2 Pro Channel**, and comes neatly fitted into a flight case for portability and convenience.

...a double agent,
escaping with
the TrakPak...

TrakPak contents:

- JM47 Meekrophone
- JOEMEER VC3v2 Pro Channel
- Shockmount
- Power supply
- 5m Mic cable
- Operation guide

The TrakPak also offers a saving to the purchaser; the TrakPak costs less than the JM47 and Pro Channel VC3 when bought separately, and it offers more recording power and facility (Condenser mic, pre amp, photo optical compressor, enhancer, dual balanced outputs) than anything else that has gone before. This is a unique package that is greatly needed in the pro audio industry.

The Meekrophone and TrakPak have been **secret weapons** of the JOEMEER lab for too long. The secret is out - Get the TrakPak, and save the world, before its too late!
