ShopCAM

7821

The ShopCAM is a flexible gooseneck video camera that "clips" to a variety of surfaces. Simply connect the pre-attached video cable to a TV monitor or LCD projector and the camera will display enlarged objects up to 50x for presentation. When demonstrating to a group, you not only save time, but stimulate communication. Using the ShopCAM, your students will retain more visual knowledge when viewing intricate details. The ShopCAM is totally portable and versatile. Where you use it is up to you!

Applications

- **Reading a book** Students can read along with you
- **Auto / mechanic** Clamp to a car and focus on the engine
- **Welding** Demonstrate welding techniques
- **Woodworking** Save time demonstrating to the whole group
- **Mechanical drawing** Display close up details
- **Electronics** Soldering, wiring, circuits, routers, and planers
