KNOWLEDGE THROUGH VISION

# Applied Vision™ Software

Applied Vision Software for Windows is an innovative software application that works seamlessly with Ken-A-Vision digital USB products, enabling students to capture and manipulate videos and images from their experiments. Advanced functionalities such as image amalgamation and measurement export empower students as they compile, analyze, and integrate data and multimedia into reports, all with a user-friendly and customizable graphic interface.

**New Applied Vision 2**

## Applied Vision Software Features:

- ✦ Capture and save still images in multiple formats
- ✦ Record movies in AVI format
- ✦ Capture a time-lapse as a movie or series of stills
- ✦ Amalgamate images with various algorithms, and fine-tune the positioning to properly align and compare images
- ✦ Search for media files by name or date
- ✦ Undo and Redo functions to ten steps
- ✦ Magnifying glass for spot magnification
- ✦ Measure and log distance between points or area within an ellipse
- ✦ Easily export logged measurements to a Microsoft® spreadsheet
- ✦ Drawing tools: insert text, draw arrows, lines, and circles, pencil tool, brightness and contrast, negative image, and more
- ✦ High quality full screen live video
- ✦ Clean Screen mode expands captured image to window size for immersive editing
- ✦ Share live video across a network
- ✦ Instantly email images
- ✦ Personalize your screen with customizable background images
