Information To The User:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna and/or increase the separation distance between the equipment and the receiver, and/or connect equipment into an outlet on a circuit different from that which the receiver is connected; and/or consult your dealer or experienced radio/tv technician for help.

Weight	0.13 kg (0.0128 lbs)
FPS (frames per second)	30 fps
Focal Distance	Preset for Microscopic eyepiece
Eyepiece adaptor (built in)	27.5.0 mm - 30.0 mm

Connecting The USB Cable

Prior to connecting the USB cable, you must first install the supplied software.

Pre-attached cabling makes it easy to connect the USB cable to you computer. Simply insert the rectangular end of USB cable to the USB port of your computer. **Note:** The USB port will supply ample power to the the PupilCAM®. No power supply is required.

Connecting The Video/Power Cable

Your Video/Power cables are pre-attached to the PupilCAM. No connection is required to the camera. Simply connect the video cable into the "video-in" on your TV/monitor. Then connected the power supply to the power cable. Next connect the other end of your power supply to 110 volt (or 220 volt) electrical outlet.

Connecting to a Microscope

The PupilCAM® is designed exclusively to work with a microscope (compound or stereoscope). A variable eyepiece adapter is built-in to the camera.

- Gently twist the PupilCAM® as you push it down the onto the microscope.
- Connect the pre-attached cable to your TV/monitor or computer.
- Put a slide on your microscope and focus.
