

4x1 s-Video Switcher

4x1S

The Kramer 4x1S is a high quality 4x1 mechanical switcher designed for s-Video (Y/C) signals using standard 4 pin s-Video connectors. It accepts up to four inputs and allows the user to select any input to be routed to one output using buttons located on the side panel. High quality switching components are used to ensure minimal crosstalk and very high bandwidth. The

entirely passive design of the 4x1S eliminates the need for a power supply. Unselected inputs are automatically terminated via 75 resistors.

The 4x1S is part of the Kramer TOOLS family of compact, high quality, cost effective solutions for a variety of applications.
