

1:10 Video Audio Distribution Amplifier

VM-10AN

The Kramer VM-10AN is a compact, high quality 1:10 distribution amplifier using BNC connectors for composite video, and RCA connectors for Audio Stereo signals. It accepts one set of inputs, provides correct buffering and isolation, and distributes it to up to ten identical outputs designed to drive monitors, projectors, and other receiving devices. Bandwidth

exceeding 70MHz ensures transparent performance with typical video and audio sources. Looping inputs make it easy to expand to larger distribution systems. The VM-10AN is rugged, dependable, and is housed in a convenient desktop sized enclosure. It can also be mounted in a standard 19" rack using the RK-10 kit, which holds one unit in two vertical spaces.
