

**1:3 Microphone Amplifier / DA VM-3M**

The KRAMER VM-3M is a full bandwidth, state-of-the-art *1:3 Mono Microphone Amplifier / DA* designed for studio and other demanding applications. The VM-3M splits a single input source into three identical outputs without any discernible signal degradation. The machine provides level control via the back panel and the user can provide the appropriate DC voltage needed by condenser type microphones via a built-in jumper.

The VM-3M is fed via an external 12V DC feed, and is housed in a very compact enclosure, making it ideal for field use.

Some features and applications:

- ❖ Audio production and duplication studios.
- ❖ Audio field production applications.

**Technical Specifications:**

INPUT:	One Mono microphone 5mVpp/10K Ω on a 6.5mm phone connector.
OUTPUTS:	3 Mono line level 1Vpp/150 Ω on 6.5mm phone connectors.
AUDIO BANDWIDTH:	20-20000 Hz.
THD @ 1KHz:	Less than 0.1%.
S/N RATIO:	Better than 78 dB.
DIMENSIONS:	11.7cm X 6 cm X 3.2cm (W, D, H).
POWER SOURCE:	12 VDC 30 mA.
