

VS-21

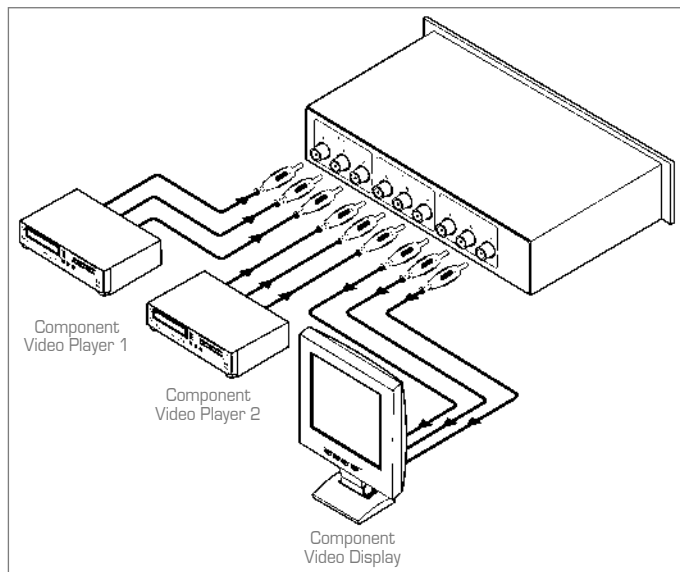

2x1 Component Video Switcher

FEATURES

- **High Bandwidth** - 980MHz (-3dB).
- **Mechanical (Passive) Switching** - No power required.
- **HDTV Compatible.**
- **Desktop Size** - Compact size. Two units can be rack mounted side-by-side in a 1U rack space with the optional RK-81 adapter.

The **VS-21** switches three identical channels simultaneously. It can serve as a high performance switcher for component video (YUV or RGB) signals. It switches any one of two component signals to a single component output. The VS-21 can also switch composite video with two audio channels, three independent composite video channels or any other combination.
