

BigLite™ 4.5

The brightest, fastest, feature-rich 4500W fixture on the market today.

Indoors or outdoors, the BigLite throws a massive light output through a real-time CMY color mixing system and various diffusion effects.

The BigLite 4.5 has three interchangeable cartridges, containing variable cyan, magenta and yellow gels allowing for any color with complete uniformity - from delicate pastels to deep saturation. All color cartridges are combined with diffusion effects such as horizontal and vertical beam shaping and grades of frost.

An energy saving standby mode gives the BigLite 4.5 an extended lamp-life and reduces heat output and fan noise.

Fully DMX controlled with a powerful electronic strobe effect, the fixture will generate a spot to wash effect three times per second and moves effortlessly at speeds up to three times faster than any competitor.

Cased in a compound plastic shell the BigLite 4.5 is water resistant and highly durable making it ideal for concerts, tours, film & television and architectural events.

Features

- Revolutionary single arm moving yoke design
- 4500W Xenon lamp
- Standard DMX 512 control
- Ultra fast pan and tilt
- Full color mixing via 3 color changing scroller cartridges with 12 frames each, fitted with 7 color densities
- Diffusion effects such as frost and beam shaping
- Electronic dimming / strobing via ballast
- Mechanical shutter cartridge
- Cartridges are designed for quick change plug & play
- Cartridges operate on standard DMX 512 for bench maintenance
- Remote, DMX controlled focus via movable reflector
- Movable reflector
- Extended lamp life and reduced heat by automatically dimming when shutter is closed
- Fast easy focus
- Weather-resistant for outdoor shows
- Reduced noise cooling system
- Extremely lightweight external electronic ballast
- Rugged thermal casing
- Easily upgradeable software
- Robust, roadworthy design
- Technician friendly design - only three tools needed for maintenance
- Safe maintenance bay, avoids unnecessary exposure to Xenon lamp
- Unique Monoclamp design can be flown above or below any truss
- Lightest fixture in its power class - 124 kg / 273 lbs.
- Height 1235 mm / 48.6 in.
- Triangular base width 830 mm / 32.7 in.
