

THE LIMPET™ ALARM

PROTECTS EVERYTHING IT IS FIXED TO

Products Proudly

With a guaranteed Battery life* that will outlast most equipment it is used with

***Its Advanced Circuit Design is Optimized for up to TEN years of use with the same Battery and is proven to outlast by at least FOUR TIMES all Alkaline Battery Operated Devices.**

4 foot Security Loop

Unlike Cheaply made "Off Shore" Brands, these Made in the USA Units are intended for use where Reliability, Quality of Manufacture and Reduced Cost of Ownership are of Paramount Importance

Dimensions: 3.75" Long x 2" Wide x 1.25" High

SIMPLE TO INSTALL - WITH AUTOMATIC SET & FORGET PROTECTION

Simple to Install, the Unit runs on a Built-In Lithium Battery and its Advanced Circuit Design guarantees an extended Life of Operation. For complete protection a supplied 4 foot Specially Toughened Security Cable is looped around a fixed object (such as the Projector Pole). The Projector and our Amplifier can also be looped together. The Unit is normally fixed to the Projector, Plasma Screen or similar device using the supplied Methylmethacrylate Glue, but you can also attach the device to any fixture using Screws or Bolts which are hidden from view after installation.

VIRTUALLY IMPOSSIBLE TO DEFEAT

Unique additional Safeguards Protect the Equipment at all times, also cutting the Loop or the Contact Closure Wire will automatically activate the alarm. No amount of jumpering or reconnection of the wires will stop the Alarm, unless the supplied Key is used to deactivate or reset the unit.

ONCE ARMED THE SIREN WILL RUN FOR UP TO 30 HOURS

The Alarm's built in Siren lets out a piercing 117 dB and will run for about 30 hours and can only be stopped using the supplied Key. If connected to an external Burglar Alarm or Contact Closure Device, this also can only be deactivated using the supplied Key.

CAN BE CUSTOMIZED FOR DIFFERENT ALARM MODES

The Installer has the option to configure the Limpet Alarm to suit different applications:

1. Siren and Contact Closure Connection
2. Silent with Contact Closure Connection
3. Loop Only

Silent Mode but connected to a Burglar System is useful when you don't want to alert the thief that the Limpet is activated.

NO FALSE ALARMS WHEN IN USE

Because the Alarm does not use Motion Sensors, the user is assured that there will be no false Alarms when operating or making adjustments to the Equipment it is protecting. For Servicing the Equipment, the Limpet can be temporarily deactivated using the supplied key.

UNIQUE KEY LOCK

To ensure the highest degree of Security, we supply two Special keys that are used to Activate and Deactivate the Limpet. The keys cannot be duplicated or purchased from a local store.

COST OF OWNERSHIP

Other Units require the battery is replaced frequently. When comparing it with other types of alarm devices, cost of ownership including the Labor involved could be as much as \$60.00 per year. The Limpet's cost of ownership is almost zero due to its low Battery drain and long life Battery, which relates to a cost saving in Batteries and Labor of almost \$600.

REPLACEMENT BATTERIES & PARTS

In the event the Battery is discharged, replacement Batteries are available from Most Hardware Stores including ACE, True Value etc, under the Brand Name, Ultalife or 10 Year 9v Battery. Replacement Loop Wire or Keys etc., are freely available from us at reasonable cost.

Part #	Description	List Price
NB-LSAS	Limpet Security Alarm with Contact Closure Connection	\$ 189.95
NB-LNA	Network Version Limpet Security Alarm	\$ 299.95
