

70V / 25V DUAL ZONE AMPLIFIER INSTRUCTIONS

The Amplifier can provide 2 Separate Zones IN and two Separate Zones OUT or the two Zones can be combined to provide either Mono or Stereo Mode depending on where the Slide switch is positioned.

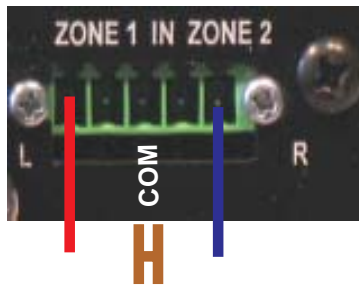

USING THE 70/ 25 VOLT DUAL ZONE AMPLIFIER IN STEREO MODE

For Stereo Operation with the Rear Slide Switch in the Stereo Position, the Amplifier will provide 22 1/2 watts to the Left Zone and 22 1/2 watts to the Right Zone Output.

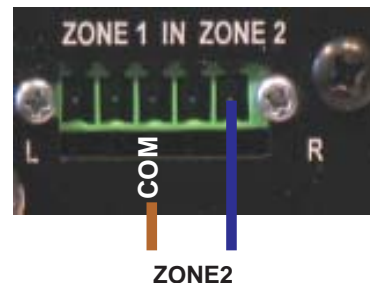

USING THE 70/ 25 VOLT AMPLIFIER IN MONO MODE

With the Rear Slide Switch set to Mono, there are two MONO possible configurations, either to two Zones each providing 22 1/2 watts Output , or paralleling the two Outputs for a total of 45 watts.
