

LIGHT MODULE FOR GOOSENECK LAMPS

With BNC Mount and Dimmer Control for Incandescent and LED Gooseneck Lamps, including all Littlelite® Gooseneck Lamps* See Note Below

BUILT IN 12 V POWER SUPPLY ELIMINATES EXTERNAL WALL WARTS

Each Module measures 4 1/4" square and 1 3/4" high, requiring a 1/4 of 1 U Rackspace. Each comes complete with four Self Adhesive Feet allowing you to place these compact units on any flat surface or you can secure the Module using the optional Panel Mount.

THREE DIFFERENT WAYS TO USE THEM

1. STAND ALONE

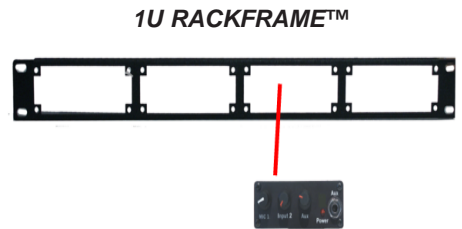

INTERCHANGEABLE DIMMING
See Note Below

2. RACK MOUNT- SPACE EFFICIENT DESIGN

With just 1U Rackspace a user can now fit **four different modules into a 1U Rack Frame**. For example: A combination of a Light Module, Stereo Mixer, Stereo Amplifier, and Power Module all fit into a 19" x 1 3/4" high space.

Other manufactures products would limit the installer to only one device!

MORE THAN 20 DIFFERENT MODULES

Each module is 1/4 of 1U Rackspace

3. PANEL MOUNT-AN ANTI THEFT MEASURE

Each module can be mounted in these frames, allowing you to secure the units to any flat surface.

NB-GLM	Gooseneck Light Module	List Price \$ 99.95

NB-GNLED	12" Nigel B LED Gooseneck	List Price \$ 79.95

At the 2004 NSCA Littlelite Booth, I was told that their recently introduced Littlelite LED Gooseneck Lamps cannot be dimmed.

OUR LAMP MODULE

I am pleased to report that when using our Lamp Module both the Old Incandescent Lamps and our LED Gooseneck Lamps are interchangeable and both can be dimmed.
