

Turn an ordinary Lectern or Desk top into a Sophisticated Wireless Sound System

With Professional Fade Free, High End CD Quality Sound

For Conference Halls, and Large and Small Rooms

Even connect directly to a House Audio System

NO LIMIT ON SPEAKER POWER REGARDLESS OF THE SIZE OF THE FACILITY

The XLR or 1/4" Locking Jacks on the Speaker/Receiver Unit enables you to Distribute your Sound throughout the Facility's House Amplified System

In all cases, no wiring or complicated set up is required.

ABOUT THE SIZE OF TWO VHS TAPES

These easy to carry small units and their "Plug and Play" design, ensures even the casual user can set them up in seconds

Simply place the Microphone /Audio Transmitter Box in a convenient place on your Lectern or Desktop. Attach your Microphone and Music Device together with the Speaker /Receiver Unit and your choice of Speakers, and you now have a sophisticated

**BELT PACK LAVALIER OR LAPEL MICROPHONES, ORDINARY MICROPHONES,
INCLUDING STANDARD WIRELESS MICROPHONES CAN ALL BE USED**

ADDING SPEAKERS WITHOUT WIRES

Nigel B Design, for user convenience, has a range of easy to Carry Portable Battery Powered Speakers with both the Wireless Receiver and 100 watt Amplifier Built-in. With an ABS Plastic Exterior, they are completely protected when shipping or Storing. When you are ready to use them they unfold to two units for both Left and Right Stereo. They can be Placed on Stands or can sit on the Floor.

You can also use your own Amplified Speaker and our Speaker/Receiver Units with your own Amplified Speakers. However the convenience of our Speaker units not only reduce "set up" time to seconds, but require no extra steps to complete the process.

EXTEND TO SOUND TO OTHER PARTS OF THE ROOM - EVEN TO THE OUTSIDE

You can add Multiple Speakers to extend the Audio Range, with no limit placed on the Power of those Speakers. Because the Audio is transmitted by RF Signals, **line of sight is not necessary**

INSIDE AND OUTSIDE

There will be times when you want to place Speakers Outside in addition to having the Main Microphone/Audio Transmitter Unit inside. With a range of up to two Football Fields there is almost no limitation as to where the Exterior Speakers are placed.

YOUR OWN AMPLIFIED SPEAKERS

With no limit on Power Output, both an XLR and 1/4" Locking Jacks are provided, so you can attach your own Amplified Speakers.

Each Speaker does require its own Speaker/Receiver Module but there is no limit to the number of Speakers that can receive the Audio Signal.

POWERED COMPUTER SPEAKERS

A 3.5 mm Mini Jack is provided on the rear of the Speaker Receiver Unit for times when sound for a small room is does nt neccitate Large Speakers.

STANDARD SPEAKERS

Because the Audio signal is transmitted as Digital at Line Level, an Amplifier must be connected to the Speakers in order to have Sound Output.
