

5000FX

5-CHANNEL TABLETOP FX MIXER

THE ULTIMATE TABLETOP MIXER FOR THE PRO DJ. Harnessing the power of Numark's custom digital processing legacy, the 5000FX is a 5-channel tabletop mixer (with 3 phono, 9 line and 2 mic inputs) that allows you to control the most complex mix situations. With patented Beatkeeper™ technology, a DJ can auto-detect BPM and simultaneously manipulate a mix from 2 different sources. The unit's on-board sampler (with 30 seconds of memory) and multi-effects processing capability gives additional options, including smart looping and BPM synchronization. DJs can also scratch any audio source utilizing the unit's scratch/effect/pitch wheel.

Offering superior audio effects and the most accurate BPM display on the market, the Numark 5000FX sets a new standard in tabletop mixers, delivering all the bells and whistles you'll ever need in one powerful package.
