## CDN25+G Karaoke CD Player Product Overview

### Product Description

The CDN25+G is a rack-mountable dual CD player with dual composite RCA video outputs for CD+G karaoke lyric and graphic display. These outputs connect to video mixers, monitors, TVs, or switches in NTSC and PAL formats, and become active when playing a CD containing CD+G graphics data, which is commonly used to display karaoke lyrics.

Other features include an interactive pitch/search wheel with  $\pm 8/16\%$  pitch control, rubber buttons, and auto cue. The CDN25+G also has S/PDIF digital output, a sleep mode to save laser life, and is CDR compatible.

### Positioning

Straightforward and affordable rack-mountable dual CD player with karaoke functionality

### Applications

Karaoke, club, and mobile DJ applications

### Key Features and Benefits
