

Product Description

The DVD01 is a dual rack-mountable DVD player with $\pm 50\%$ pitch range, allowing DJs to beatmatch both DVD music videos and CDs. An on-board video switcher means that the DVD01 can operate without an external video mixer.

With a proven, familiar interface based on Numark's leading line of dual rack-mountable CD players, DJs can easily set cue points, adjust tempo, and match beats. All standard DVD menu controls are included, accessible with dedicated navigation buttons. There is also non-seamless looping for repeating desired clips.

Positioning

Easiest way for professional DJs to integrate video

Applications

Club and mobile DJ applications featuring video

Key Features and Benefits
