

CM200USB

5-CHANNEL USB DJ MIXER

BRING THE POWER OF YOUR LAPTOP INTO THE MIX. Perfect for club or studio work, the CM200USB is a 5-channel mixer that utilizes the design and features of our famous CM200 mixer and adds the power of USB I/O, allowing you to play audio files from your Mac or PC. DJs can even record live performances onto their laptop or desktop.

With master balanced XLR outputs (with Record and Zone), a 3-band EQ on every channel and other effects and features that will keep your mixes energized for years to come, the Numark CM200USB is a powerful DJ and studio tool, linking traditional input options with the power of USB connectivity.
