

DVD01

PROFESSIONAL DUAL DVD VIDEO PLAYER

THE ULTIMATE MEDIA PLAYER, IN A DUAL DECK SYSTEM.

Numark, the first company to offer the industry a dual professional CD deck, is now the first to offer a professional dual DVD player.

Professional grade components ensure pristine playback of all DVD media, including DVD-R, VCD and SVCD formats. An intuitive control panel provides full access to all standard menu options, and gives users the ability to choose from a wide range of effects, including cue, loop, zoom, angle, slow motion and pitch control.

The DVD01 is a dual rackmountable unit with $\pm 50\%$ pitch range, allowing DJs to beatmatch both DVD music videos and CDs, and an on-board video switcher means that the DVD01 can operate without an external video mixer. It's everything you need to master your video output.
