

VM03-MKII

3-SCREEN VIDEO DISPLAY

FULL-TILT VIEWING FOR YOUR VIDEO OUTPUT. The Numark VM03-MKII is a 3-screen/6-input LCD video display monitor designed for any video monitoring application. The advanced design of the VM03-MKII allows the user to monitor video sources in either a rack-mount (3 rack spaces required) or tabletop setting.

What separates the VM03-MKII from other video monitors on the market is the adjustable viewing angle. This unique design allows the video producer or engineer to customize the VM03-MKII viewing angle of the up to 96 degrees. This flexibility is ideal for DJ and broadcast applications, where limited space may prohibit easy viewing angles.
