

CDR Mini Hi-Fi System

FW-R8

Mini Hi-Fi System with Integrated CD-Recorder

- 2 x 100 Watts RMS Stereo
- Make your own CDs with Integrated CD-Recorder
- Replay your own CDR disc in any CD player
- 3 CD Changer
- Double Speed Recording from CD
- CD Text input, editing and recording
- Record your own voice with microphone mixing
- Simplified recording modes : CD > CD and Compile CD
- Record onto CD from CD changer, radio, microphone or any external source
- 3-Way Bass Reflex Speaker System with wooden finish
- Subwoofer Ready
- Digital Input and Output
- Automatic Level Control for perfect compilations
- 42-Key Remote Control

Let's make things better.

PHILIPS

Sound Enhancement

2 x 100 Watts RMS Stereo

100 watts continuous RMS power output per channel, at 6 Ohms, from 25 Hz-20 kHz, with no more than 10% Total Harmonic Distortion (THD).

Integrated Audio CD Recorder

Make your own CD's with Bit-perfect digital quality.

Treble & Bass Control

Bass and Treble allows sound adjustment of high and low frequencies to personal preferences. Balance allows the sound adjustment of the left and right speaker.

Loudness and Pure Sound Control

Loudness is dynamic sound adjustment that amplifies high and low frequencies depending on the volume (the higher the volume, the less the amplification). Thereby it creates 'richer' sound impression already at low volume.

Pure Sound Control allows you to switch off all sound adjustments at the touch of a button.

3-Way Bass Reflex Speaker System

Equipped with one 6 1/2" woofer for smooth low and mid range reproduction, one 2 1/2" ferro-fluid cooled tweeter and one 1" Polydome tweeter for crisp high tones.

Automatic Digital Record Level Control

During recording from the internal CDC, the unit automatically equalises volume levels between CDs, so that there are no unpleasant volume jumps during playback of the recorded CD.

Incredible Surround™

Dramatically expands the soundfield to envelop the listener in their music. With the usual two-speaker setup, Incredible Surround™ widens the soundstage farther to the left and right while adding the greater depth of clubs, concert halls and stadiums for a more exciting experience.

Subwoofer Ready

Affords easy access to greater dimensions in sound with output signals available for connection to a subwoofer.

Convenience

Unique 'Recording Studio' Control Console

Ergonomic grouping of all your recording functions in one easy to find section.

Simplified Recording Mode

CD > CD duplicates entire CD. Compile CD is perfect for simple compilation.

Double Speed Recording from CD

Make your own CD in half the time.

CD-Text

No more need to look-up the track you want to play or record in the CD inlay booklet, simply select the track by name from the display, directly from the disc. The display can show both artist and title for the entire album as well as individual tracks. With the CDR Mini HiFi System, you can also create your own CD Text information for e.g. your own compilations.

3-Disc CD Changer with Motorized Drawer

Multi-disc play capability provides more than three hours of continuous music.

CD-Rewritable Compatible

The player offers 100% playback guarantee of CD-Rewritable CD's over the entire lifetime of the player. Even CD-RW audio recordings on computers can be used.

Microphone Mixing

Now you can be the STAR! Record your own vocals or musical instrument. Better still record yourself singing or playing along with your favorite artist.

Integrated digital tuner

Listen and record your favorite radio stations (record in FM only).

Digital Clock with Record Timer

Use the built-in digital clock to record that special radio show from the built-in tuner or any external source while you are away.

42-Key Remote Control

The ergonomically styled remote control gives you access to all essential functions, and has a 10-key pad for entry of CD Text and direct access to track or tuner presets.

CD Synchro CD Recording

Make a simple synchronised start recording from either analog or digital sources.

Energy Saving Standby Mode (<2 watts)

Most systems consume 10-15 watts just on standby. Philips systems consume less than 2 watts of energy on standby for big saving to the listener.

Shuffle One/All Discs

Plays all selections on a particular disc or multiple discs in multi-disc players in random order, ignoring the sequential order in which they were originally recorded.

Design

Design Control

The attractive design focusses direct attention on the main product function, the CD Recorder drawer. This emphasis is supported by the logically designed recording control panel. The large mirror coated display lens reinforces the high technology aspect of the product, while the controls are structured logically and are easy to use. The light wood finishing on the speakers complements the centre unit design well.

Oversized, MultiColor, Digital FTD Display

This large display is easy to read at any distance with no distortion or distraction and the multi-color format makes it easy to recognize different functions at a glance.

Detachable Cloth Speaker Grilles

Detachable cloth covered grilles protect delicate speaker components with rich, high-tech styling.

Inputs and Outputs

1 x Digital Coax Input

A digital input is foreseen to connect digital sound sources. The built-in sample rate converter ensures that a wide range of sources can be connected (e.g. CD players, DVD players, DAT players etc.).

1 x Digital Coax Output

A digital output connection is foreseen to enable digital (CD) recordings from any of the digital inputs.

1 x Analog Input

An analog input is foreseen to connect analog sound sources (e.g. phono, CD, Tape etc)

1 x Analog Line Output

An analog output connection is foreseen to enable analog recordings from any of the analog inputs.

1 x 3.5mm Microphone jack

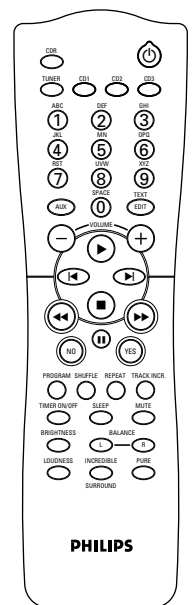

A microphone input with level control is provided to connect any standard microphone to record your own voice or instrument.

1 x Headphone Jack

Plug in a set of stereo headphones and enjoy your favorite CD, cassette, or radio station without disturbing other family members in the room. This convenient feature allows different people in your household to use different electronic entertainment media without interference.

1 x Subwoofer connections

Affords easy access to greater dimensions in sound with output signals available for connection to a subwoofer.

UPC Code: 0 37849 89364 7

Product Dimensions:
10.4" W x 12.2" H x 13.2" D (electronics)
9.4" W x 12.2" H x 9.8" D (speakers)

Package Dimensions:
22.8" W x 28.3" H x 14.1" D

Product weight: 48.5 lbs.

Carton contains: 3CD Changer + CDR Mini Hi-Fi System, Multi-Function Remote Control, Batteries, Operating instructions, Warranty information
