

Instrument Cables

Defender

Specifically designed to help reduce noise created by single coil pickups, Defender's quad wire, lifted-ground construction is based on 70-year-old Transmission Line Theory — no magic, just a well-engineered way to reduce irritating hum, buzz and crackle.

- Gold-plated 1/4" copper-core ShowSavers™ brand phone plugs standard
- AmeriQuad™ noise-reducing geometry, 96% braided shield bulletproof Kevlar reinforced cable core, Pro Co's Armorflex™ jacket

- Free Velcro cable tie
- Really flexible, really quiet, really strong, adding no sound of its own
- Lifetime warranty — any excuse, even abuse

Model Number	Length in Feet	Suggested Resale
DF-10	10	\$66.49
DF-15	15	\$71.49
DF-20	20	\$78.99
DF-25	25	\$85.99

Sir Tweed

With a true Nylon vintage-look overbraid and Kevlar reinforced cable core, Sir Tweed is one handsome cable. Built for a lifetime of use and abuse, the 41-strand center conductor and a 90% braided copper shield provide superior noise rejection while retaining impressive flexibility.

- Classic Tweed look, great sound and indestructible construction
- Gold-plated 1/4" copper-tipped ShowSavers brand phone plugs standard
- Bullet proof Kevlar reinforced core

- Free Velcro cable tie
- Looks great on stage with acoustic-electric guitars and many old Pauls
- Lifetime warranty — any excuse, even abuse

Model Number	Length in Feet	Suggested Resale
TW-10	10	\$69.49
TW-15	15	\$77.49
TW-20	20	\$84.99
TW-25	25	\$95.49

Also available with Cocobola wood handles.

Excalibur

The flashiest guitar cable on earth. From its high-luster exotic nickel ShowSavers connectors to its low capacitance 90% spiral-shielded cable, Excalibur provides outstanding flexibility, durability and incredible stage presence.

- Premium quality tour-grade cable
- Nickel-plated 1/4" copper-tipped custom designed ShowSavers brand phone plugs standard
- Free Velcro cable tie
- Incredible looking high-luster handles
- 20-year warranty

Model Number	Length in Feet	Suggested Resale
XG-10	10	\$48.49
XG-15	15	\$51.49
XG-20	20	\$54.49
XG-25	25	\$56.99
XG-30	30	\$60.49

Several connector options, such as right angle plugs and gold or nickel connectors are available. See page 28 for details and pricing.

Instrument Cables

ProPatch

New for 2002

A new addition to Pro Co's instrument cable line in 2002, Pro Patch features black ShowSavers connector handles and Pro Co's Armorflex-jacketed 120SX oversized jacket for a handsome cable with no mechanical handling noise and tremendous flexibility. A step up from Excellines in looks, flexibility and durability, Pro Patch offers all this without getting into the higher costs of our exotic, extra-performance products.

- Cosmetically "cool"
- Lies down flat on stage and follows you everywhere effortlessly

- Right angle to right angle cable versions make great heavy-duty pedalboard connections
- 10 year warranty

Model Number	Length in Feet	Suggested Resale
PP-1	1	\$16.49
PP-3	3	\$17.49
PP-5	5	\$18.49

PP-20	20	\$23.99
PP-25	25	\$25.99
PP-30	30	\$27.99

Excellines

Since 1982, Excellines have been Pro Co's standard guitar cables. Using ShowSavers standard 1/4" connectors and 23rd generation Pro Co 120S1 wire, and the blue "widget" strain relief under each connector (the cable's trademark), Excellines already have offered over a million users a sturdy, reliable cable. Cheap because of the huge volumes built, Excellines offer one of the best price to value ratios in the audio cable business.

- Basic sturdy guitar cables with all components 100% made and assembled in America
- No off shore "made in somewhere else" stickers to look for

- Long lasting cables for musicians on a tight budget who are looking for cables cheap, not cheap cables
- 10-year warranty

Model Number	Length in Feet	Suggested Resale
EG-1	1	\$12.49
EG-2	2	\$12.99
EG-3	3	\$13.49
EG-5	5	\$13.99

EG-25	25	\$18.99
EG-30	30	\$19.99

StageMASTER

There is always a need for inexpensive products, for starving musicians, civic and religious groups with limited budgets, for price sensitive buyers and for applications in which wear and tear just do not exist.

StageMASTER guitar cables are inexpensive and like all Pro Co guitar cables are still 100% made in America with 100% American-made parts.

Model Number	Length in Feet	Suggested Resale
SEG1	1	\$7.99
SEG3	3	\$8.49
SEG5	5	\$8.99
SEG10	10	\$10.49
SEG186	18.5	\$13.49
SEG25	25	\$15.49

Several connector options, such as right angle plugs and gold connectors are available. See page 28 for details and pricing.

Microphone Cables

Merlin

Designed specifically for hostile environments (electronic news gathering, sportscasting, underwater recording), Merlin uses Pro Co's 96% braided shield, ArmorFlex 424BX₂K (4-conductor, 24 gauge, braided shield Kevlar in the core, super thick jacket) wire and Neutrik NC3FXB-HD and NC3MXB-HD gold contact, watertight XLR connectors to provide a quiet, flexible, unbreakable cable for situations where a retake is impossible or totally out of the question. The cable's quad construction eliminates up to 20 db more noise than anyone's two conductor mic cables, including our own.

- For all practical purposes, unbreakable
- Gold contacts for use in moist/wet environments (outdoor recordings, live broadcasts)

- Incredibly flexible, follows the user wherever s/he may go on stage
- Lays down flat, easy to coil
- Watertight, completely submersible use intended
- Free Velcro cable tie
- Lifetime warranty — any excuse, even abuse

Model Number	Length in Feet	Suggested Resale
ME-15	15	\$74.49
ME-20	20	\$79.99
ME-25	25	\$84.99
ME-30	30	\$89.99
ME-50	50	\$111.99

AmeriQuad

Using Pro Co's 424BK (4-conductor, 24 gauge, 96% braided shield, Kevlar in the core) wire, and bi-wire technology, AmeriQuad is our premium cable for church systems, touring sound systems and other situations where high RFI fields may present a noise problem. The bi-wire technology adds up to 20 db more noise rejection than a regular 2-conductor cable (it acts like much less of an antenna to the system). Needed where "Come back, good buddy!" and other such annoying problems must be avoided at all costs.

- Reduces system noise considerably
- Black Neutrik connector, gold contacts
- Lays down flat, easy to coil
- 20 year warranty

Model Number	Length in Feet	Suggested Resale
AQ-5	5	\$37.49
AQ-10	10	\$42.49

AQ-50	50	\$82.49
AQ-100	100	\$133.99

MasterMike

Pro Co's mainstream 2-conductor, highly durable, 91.5% braided shield mic cables, designed for lead singers with an attitude — tough, reliable, designed for rough long-term use. Its try-and-break-me construction will keep your act running night after night, year after year.

- Black Neutrik connectors, silver contacts
- One tough puppy
- Over 1,000,000 in use all over the world
- 20 year warranty

Model Number	Length in Feet	Suggested Resale

M-30	30	\$42.49
M-50	50	\$55.99
M-100	100	\$92.99

AmeriQuad and MasterMike microphone cables are available with XLR male or female right angle plugs, colored I.D. bands and On/Off switches on the female end. See page 28 for details and pricing.

Microphone Cables

Excellines

Our largest selling microphone cable, using Neutrik's IDC (insulation displacement connection) XLR connectors and Pro Co's time tested 224S (2-conductor, 24 gauge, spiral shield) cable. Quick to assemble using a combination of humans and robots, and very reliable because of the fabulous Neutrik strain relief, Excellines offer decent flexibility, good shielding and an extremely popular price.

- High speed production method reduces costs
- Great for normal boardroom, speaker podium or weekender band use
- 10 year warranty

Hi Impedance (Hi-Z) cables

A reliable cable for hooking up Hi-Z microphones to guitar amp inputs or to sound systems with Hi-Z mic inputs.

- Wired pin 2 hot as standard and pin 3 hot is also available
- Uses Neutrik XLR female and ShowSavers 1/4" connectors

- Should not be used in lengths greater than 20 feet to avoid high frequency rolloff
- 10 year warranty

Model Number	Length in Feet	Suggested Resale
EXH-20	20	\$22.99
EXHP3H-20	20	\$22.99

Low Impedance to High Impedance Transformer Cable

The proper way to connect a professional low impedance microphone to a consumer grade high impedance mixer input or guitar amp input is to provide a transformer that converts the low impedance microphone output to high impedance as close to the amp/mixer as possible. This cable has a very clever Neutrik 1/4" transformer plug on one end and a Neutrik XLR female connector on the other to accomplish this important task.

- Excellent transformer for the size (it's too small to take lots of power and saturates [distorts] easily when too much bass is run through it).
- Best used for voice only
- Flexible and durable, needed often in DJ applications
- 10 year warranty

Model Number	Length in Feet	Suggested Resale
EXHT-20	20	\$61.99
EXHT-25	25	\$64.49

StageMASTER

There is always a need for inexpensive products, for starving musicians, civic and religious groups with limited budgets, for price sensitive buyers and for applications in which wear and tear just do not exist.

StageMASTER mic cables are inexpensive, built by our friends at Neutrik in their Chinese plant and we can assure you that these are the best inexpensive mic cables available anywhere.

Model Number	Length in Feet	Suggested Resale

SMM30	30	\$19.49
SMM50	50	\$21.99

Speaker Cables

Fat Max 8 Gauge Speaker Cables

Fat Max makes every other speaker cable look like it's on a diet. The truth of the matter is that to provide proper damping factor and have really tight low end that produces the tonality of your instrument (instead of the tonality of the free air resonance of your speaker) you need lots of copper. Lots of current (volume) needs lots of copper. Fat Max's 8 gauge cable is as much bigger than 12 gauge as 12 gauge is to 16 gauge, 256% bigger in fact. To even make Fat Max work, we had to completely redesign 1/4" and dual banana plug speaker connectors and design unique ways to get Fat Max to fit into a Speakon connector.

- Ultrasonically welded, no whimpy solder connections allowed
- No measurable DC resistance to be found
- Gold contacts on 1/4" and banana plugs
- Tightens low end signal remarkably, even in 3' lengths
- Can be used as welding leads or to tow your boat in a pinch
- Lifetime warranty — any excuse, even abuse

PowerPlus 12 Gauge Speaker Cables

Pro Co's Power Plus speaker cables use specifically designed oxygen-free ShowSavers brand speaker connectors and Pro Co's ArmorFlex jacketed 12 gauge, 65 strand speaker wire, providing the user with the best industry-standard 12 gauge cables available.

- Very flexible, coils/uncoils very easily
- 12 gauge copper-core ShowSavers 1/4" speaker connectors offer an improvement to this type of connector (which really should not be used in speaker applications in the first place)
- Available in 1/4", banana plug and Speakon versions
- 20 year warranty

Excellines 14 Gauge Speaker Cables

No one should be running a live sound system with anything less than 12 gauge wire. Alas, knowledge and cost often prevent this, but running a system with live entertainers with less than 12 gauge wire is just going to lessen the audience's enjoyment of the performance. In the last 20 years the popular gauge has increased from 16 gauge to 14 gauge (the smaller the number, the bigger the wire). As the industry grows more aware of the effect wire gauge has on damping factor, 12 gauge is selling more and more, but for now, 14 gauge is the standard gauge speaker cable sold for portable use.

- ShowSavers brand 1/4" connectors
- Sturdy banana plugs
- Neutrik Speakons
- Large varieties of optional end configurations
- 10 year warranty

Speaker cables are available with 1/4" or Speakon right angle plugs. See page 28 for details and pricing

Speaker Cables

Excellines 16 Gauge Speaker Cables

Pro Co does not recommend the use of 16 gauge speaker cables for live use. Having said that, we sell 50,000 of them a year. Use them in systems with 100-200 watts only, nothing more. Ours are sturdy, well-built cables, using ArmorFlex speaker cable and ShowSavers plugs, Pro Co Banana plugs and Neutrik Speakons. They just need more copper than this for professional jobs.

- Too much resistance for most live applications, making amps work way too hard
- Severe power loss
- Poor damping factor
- 10 year warranty

Speaker cables are available with 1/4" or Speakon right angle plugs. See page 28 for details and pricing

PowerPlus 11 Gauge Speaker Cables (Two Circuits)

Pro Co's 11-4 (11 gauge, 4-conductor) cable was designed to fit into Neutrik NL4FX 4-conductor Speakons, the largest gauge of stranded wire that we could practically "fit" into these wonderful speaker connectors. This allows users to get the maximum impact possible from the improvements these connectors provide the trade.

- New 50 amp Neutrik Speakons
- High strand count, flexible 11 gauge, 4-conductor wire
- 20 year warranty

PowerPlus 13 Gauge Speaker Cables (Four Circuits)

Pro Co's 13-8 (13 gauge, 8-conductor) cable was designed to fit into Neutrik 8-conductor Speakons, the largest gauge of stranded wire that we could practically "fit" into these wonderful speaker connectors. This allows users to get the maximum impact possible from the improvements these connectors provide the trade.

- 30 amp Neutrik Speakon connectors
- High strand count, flexible 13 gauge, 8-conductor wire
- 20 year warranty
