

Preliminary

Solo TableTop Wireless Boundary Microphone

The Solo® TableTop Wireless Boundary Microphones enable multiple phone conference participants to use a single microphone. Units are placed strategically on the conference table to ensure that all participants can be heard clearly - without wires getting in the way or limiting the distance to the speaker unit.

With 8 hours of talk time the Solo TableTop is designed to last. The microphones can be fully charged in 2 hours in the Solo Executive Charging Tray (charges 8 units simultaneously) or the Solo Desktop Tray.

Revolabs Solo™ microphones use digital spread spectrum and state of the art microphone technologies that reduce interference from other wireless devices and eliminate “buzzing” in the audio from cell phones.

The Solo Tabletop is compatible with all Revolabs Solo™ Systems containing MaxFlex™ technology, allowing unprecedented flexibility to customize audio for the many demanding needs of corporate collaboration.

The units are available in omni and directional microphone patterns for even more optimization.

Highlights:

Voice-Optimized
