Revolabs Announces Wireless Boundary Microphone

Revolabs Solo™ Tabletop Joins Innovative Family of Products

Maynard, MA –November 29, 2006 – Revolabs, Inc. a wireless solutions company, announced today the introduction of a wireless boundary microphone. The new Solo Tabletop joins the industry's leading wireless solution for conference rooms and collaborative spaces. When paired with the Solo Executive or Solo Desktop wireless microphone systems, the new Solo Tabletop brings an unprecedented level of freedom to room layout and design.

“The Solo Tabletop solves many of the issues with current boundary microphone offerings.” Martin Bodley, President and CEO of Revolabs said. “Soon after we introduced our Solo wireless microphone products, people began asking us to solve the problems with existing tabletop offerings. Leveraging the innovative and breakthrough capabilities of the Solo Products, the Solo Tabletop provides unprecedented flexibility while addressing RF interference issues, security concerns and most obviously the absence of wires.”

Revolabs products contain **MaxFlex™** technology which allows any combination of up to 16 (24 in Europe) Solo Wearable and Tabletop microphones in a single area. The stylish small form factor and features like rechargeable batteries and data encryption make the patented Solo Tabletop microphone a truly breakthrough product in the industry.

“Today's team rooms and collaborative spaces are being used for a variety of reasons ranging from small teleconferences, video conferencing, project meetings to large town hall presentations, training sessions, panel discussions and webcasts.” said Martin. “Companies finally have the flexibility to optimize the audio performance for the many demands of these critical spaces, thus maximizing benefits from capital equipment investments.”

The new Solo Tabletop microphone is compatible with either the Solo Executive 4 or 8 Channel Systems, or the stand alone Solo Desktop system. The Desktop's base serves as both a charger and receiver which can be routed into a room's audio system or USB port of a computer.

Each Solo Tabletop microphone, measures .9" x .8" x 2.6" . Additional features include;

- | | |
|-----------------------------------|---|
| ? Range of 30 m. (~100ft) | ? Full duplex audio, via 2.5mm audio-out jack |
| ? 128-bit digital encryption | ? 8 hours battery life (2 hr recharge) |
| ? Audio bandwidth of 100-8,000 Hz | ? Directional or omni-directional patterns |

The Company is accepting orders now with deliveries beginning in early Q1 2007.
