SONY

Inflator with the Oxford EQ and Dynamics

Features

- *Increases the loudness of almost any programme material.*
- *Creates warmth, character and dynamic excitement, similar to that of analogue systems.*
- *Provides virtual headroom above digital maximum to allow percussive peaks to pass without causing signal overload.*
- *Creates artistic effects ranging from subtle tube-like harmonic characteristics for warmth, presence and 'in your face' fatness, to outright saturation distortion modelling.*
- *Features two modes of operation - direct and band split - for maximum flexibility and artistic creativity. These two modes also ensure optimal DSP usage.*
- *Digidesign ProTools HD, Mix compatible (RTAS version also included).*
- *TC Works PowerCore compatible.*

Minimum System Requirements ProTools:

Approved Digidesign CPU and hardware
Mac OS 9.0.4 or higher including OS X 10.2
Minimum Display 1024 x 768
RAM 256Mb minimum
