

SONY

CDR-W33 CD Recorder/Player

Based on years of experience in both the development of the CD format and in the manufacturing of CD players and drives, Sony is proud to introduce the CDR-W33 CD-R(W) Recorder/Player for professional music recording applications. The CDR-W33 incorporates special features, such as 24 bit AD/DA converters, Built-in DSP processing & CD-TEXT support.

MAIN FEATURES:

- On-board, selectable DSP functions: Parametric EQ, Limiter & SBM (Super Bit Mapping™)- provides the same near 20-bit dynamic range as Sony DAT recorders.
- High Quality 24 bit AD/DA converters.
- CD-TEXT support Disc/Track name can be displayed and edited from AM Controller/ supplied Remote Commander™ or optional PS2 (23 characters per name).
- Optical & Coaxial digital Interfaces, plus analog unbalanced phono jacks.
- Flexible remote interface includes Control-S & PS/2 (for PC keyboard). PC keyboard is assignable to basic control and text entry.
- Built-in 32kHz - 48kHz Sampling Rate Converter.
- 2 Times FINALIZE
- Recording Media: Supports CD-R-DA, CD-RW-DA
- Full Status Florescent Display
- Supplied Wireless/Wired Remote Control
- 2U rack mountable
