

Sony is pleased to introduce the DMX-R100 Digital Audio Mixer. This product was initially launched in April 2000 with a suggested list price of \$20,000.00 and was offered only through the Sony direct channel. Now, with over 2000 units sold worldwide and with a new, affordable suggested list price of \$16,000.00, Sony is making this successful product available to all of its resellers! The DMX-R100 is a high-quality digital audio mixer designed for a variety of professional applications, including recording studio, audio-post and television broadcast. The mixer incorporates an ergonomic user interface, professional automation, full 5.1 surround capability and machine control.

Sony introduces the DMX-R100 Digital Audio Mixer

DMX-R100 • Suggested List Price \$18,400.00 ▼

Key Features

- 48 full channels and 8 return channels (56 mixing channels total) – Can be configured for a variety of analog and digital inputs and outputs with the addition of optional I/O cards, which may be loaded into the four provided option slots.
- 24 bit/96kHz capability – Allows compatibility with high-resolution audio formats and offers superb sound quality.
- 25 10-bit resolution, touch-sensitive motorized faders – Provides precise & easy-to-use touch-write punch-in/punch-out dynamic automation capability.
- SVGA touch screen – Allows easy navigation of the console's functions, with a high-resolution graphical user interface.
- Channel function controls – Channel strip controls have individual knobs and switches on the control surface with full status indication of each parameter on the color SVGA display located directly above the channel controls. This allows intuitive access to various functions, including input trim, bus assigns, delay, EQ, dynamics and aux. buses.
- Machine control interface – The DMX-R100 provides transport control for up to six machines. This includes two 9-pin control ports, plus support of MMC (MIDI Machine Control).

Key Applications

- Live production
- Recording Studio
