

Sony is pleased to introduce the DMX-P01 Portable Digital Mixer. The DMX-P01 digital mixer is a lightweight and portable field-mixing unit developed for electronic news gathering (ENG) and electronic field production (EFP) recording. The unit has 32-bit, full digital sound processing and its unique Scene Memory Recall feature enables users to instantly recall up to ten different user-defined parameter settings, providing the DMX-P01 portable digital mixer with the ability to store and recall settings including limiter and compressor. This allows users to recall favorite settings instantly, which is very useful when switching between different recording environments.

Sony introduces the DMX-P01 Portable Digital Mixer

DMX-P01 • Suggested List Price \$2,800.00 ▼

Key Features

- Provides outstanding sound Quality for ENG and EFP applications.
- Can be used in low-light conditions.
- Meter calibrations can be easily changed from one type to another without the need to replace the entire meter.
- Verifies that the mixer's audio level matches the level recorded to the camcorder.
- Users can effortlessly store and recall parameters from the setup menu.
- Allows system to recall parameters in three different ways: with the default factory settings, with the same settings as the last time the unit was used, or with the parameters of one specific scene memory.
- Allows users to recall up to ten different user-defined parameter settings or the factory default settings.
- For applications requiring additional inputs, DMX-P01 mixers can be cascaded using a digital cascade connection with no sound downgrading.
- Can be used to send audio to digital peripheral equipment such as DAT recorders.

Key Applications

- ENG
- Location Recording
