[POP Info](#)

- Swivel earcups for DJ and remix applications
- Reversible earcups for added flexibility
- Auto return swivel mechanism
- Supra-aural design for excellent listening comfort
- 50 mm diameter driver for reference-quality sound
- High-energy Neodymium magnets
- 3000 mW power handling
- Folding design
- Wide molded headband for long-lasting comfort
- Stereo UniMatch® plug for phone jacks and minijacks
- MSRP: \$149.99

## ● Features

- **Studio Monitor Series Headphones** incorporate high-end materials and advanced engineering; critically clean, exceptionally clear sound for professional and high fidelity applications
- **Swivel earcups for DJ and remix applications** enable single-sided monitoring. DJs can listen to house sound with one ear while they cue up the next track with the other. Convenient for on-shoulder use.
- **Reversible earcups** for even greater monitoring flexibility
- **Auto return swivel mechanism** brings the earcups back to standard listening position -- another nice touch from Sony
- **50 mm diameter drive units** for reference-grade sound; enable superior power handling; deeper bass, lower distortion and wider dynamic range; frequency response extends down to an extraordinary 5 Hz
- **3000 mW power handling** for the most stringent professional applications; stands up to day-in, day-out use at very high output levels

- **Neodymium magnets** for maximum energy and minimum size; Neodymium packs more magnetic energy per ounce than conventional Ferrite, Samarium Cobalt or Aluminum magnets; help produce ample sound output -- 107 dB/mW sensitivity
- **Oxygen-free copper cord** for maximum conductivity, minimum noise; conducts electricity better than conventional copper
- **Folding design** makes for easy storage and easy portability in a briefcase or equipment bag
- **Supra-aural design** rests lightly on the ear; creates a controlled environment for better sound; driver is positioned the correct distance from the ear canal
- **Wide, molded headband** distributes the headphone's weight over a wide area; reduced pressure means comfortable listening for hours on end
- **Headphone rest** -- serrated area on the plug acts as a "hanger;" plugged into a rack of equipment, the headphones can hang on the plug when not in use
- **Gold-plated plugs** resist corrosion for high conductivity, low noise
- **Silver finish** for a sleek, professional look

### ● Specifications

- **Sony UniMatch plug system** with fixed stereo miniplug for use with portable equipment; detachable phone plug for use with studio and home audio equipment
- **Type** Closed supra-aural, Dynamic
- **Drive Unit** 50 mm
- **Diaphragm** PET
- **Magnet** Neodymium
- **Impedance** 24 ohms
- **Sensitivity** 107 dB/mW
- **Power Handling Capacity** 3000 mW
- **Frequency Response** 5 -- 30,000 Hz
- **Headband** wide, adjustable single headband with folding earcups
- **Earcups** swivel and reversible for single-sided monitoring; auto-return mechanism
- **Cord** Oxygen-free copper; Single-sided, 10 feet (3 m)
- **Plug** Straight, Gold-plated, stereo UniMatch plug with fixed miniplug and detachable phone plug

### ● Weight

- 10.6 oz., without cord

### ● Position Statement:
