SONY

Speakers and Components

Sony offers the greatest variety of legacy audio components in the industry, with strong offerings from CD, CD Recording and tape, while it continues provide innovation in the area of speakers. With the expansion of our innovative line of flat panel matching speakers we provide the ideal match to Bravia™ and Grand Wega™ series Television Sets. Sony will continue to build upon its' heritage in the legacy audio business while looking to the future in its' loudspeaker offerings.

SONY

Speakers and Components

SA-FT1H 5.1 Speaker System
Flat Panel Speakers to match your Flat Panel Television

The SA-FT1H 5.1 Channel Speaker Package is designed to match the cosmetic of today's flat panel televisions (looks great with BRAVIA™ TV). Its' unique flat driver technology allows for speaker cabinets that are much thinner than traditional designs but makes no compromise when it comes to performance. Power handling of 110 watts matches every receiver in Sony's home audio component line making them an ideal theater solution. Wall mountable right out of the box it could not be more simple to match a flat panel TV. Unique Slim Center Channel allows for the center to be placed on top of advanced microdisplay sets (like a Grand WEGA™ TV).

Key Features/Selling Points

- Flat Panel Design
- Slim Center Speaker
- High Power Handling— With 110 Watts of power handling this speaker package can be used with all of our Receivers including the STR-DG500, STR-DG600, STR-DG800, and the STR-DG900.
- 120 Watt Amplified Subwoofer

Key Technology Stories

Flat Panel Design—Slim profile speaker cabinets create the perfect match for today's flat panel televisions.

Slim Center Speaker—With specially developed driver technology the Slim Center Channel can be placed on top of advanced microdisplays (like a Grand WEGA™ TV) where traditional speakers would not fit.

SA-CD Playback—Musicians, recording engineers, magazine reviewers and audiophiles agree. Super Audio CD brings you closer to music in its most natural form, compared to conventional digital sources.

Nano Fine Tweeter—Specially developed Tweeter designed to reproduce the demanding high frequency content of high resolution audio.
