Platinum DVD Dream®

DAV-X1 Sony® Platinum DVD Dream® System

The Sony® DAV-X1 Platinum DVD Dream® System is an all-in-one home theater system for customers who want big surround sound without a big system. The DAV-X1 simulates the surround sound of a traditional 5.1 ch. speaker system using just 2.1 speakers and is also very easy to set up.

Key Features/Selling Points

- 1 Disc DVD/CD/SA-CD Player
- S-FORCE™ Pro 2.1 Surround Sound Technology
- HDMI Output
- Easy Setup (1 Video Cable, 1 Speaker Cable, 1 Power Cable)
- S-Master® Digital Amplifier
- Digital Direct Twin Drive Subwoofer
- dts®, Dolby® Digital and Dolby® Pro Logic® II decoding
- 1 Optical Input, 3 Digital Coaxial Inputs

DAV-LF1H Sony® Platinum DVD Dream® System

The Sony DAV-LF1H DVD Platinum Dream® System is an ultimate home theater system with an integrated top loading DVD/CD/SA-CD player incorporating the latest audio and video technologies and wireless rear speakers. DAV-LF1H comes equipped with HDMI interface to ensure compatibility with the latest digital television. With its auto calibration feature, configuring the 5.1 ch. speakers to create an optimum sound field for your listening environment is automatic. Plus, it offers wireless rear speakers using DIAT™ infrared audio transmission technology to reduce speaker cables. In addition, the main unit and the flat speakers are wall-mountable with optional mounting accessories to match your flat screen televisions.

Key Features/Selling Points

- Top Loading 1 Disc DVD/CD/SA-CD Player with HDMI Output
- DIAT™ Wireless Rear Speakers
- Portable Audio Enhancer with Front Audio Input
- Enhanced Auto Calibration (Stereo Mic Included)
- Wall-mountable Main Unit + Flat Speakers (Requires optional accessories)
- 780 Watts (RMS)
- 32-bit S-Master® Digital Amplifier
- Digital Direct Twin Drive Subwoofer with Mica Driver
- 1 Optical Input, 2 Digital Coaxial Input

**Key Technology Stories**

HDMI™ Output with 720P/1080i upscaling of DVD Media — Reads the data on a standard DVD at 480P and maximizes the video resolution to best fit your HDMI compatible TV. This allows for you to enjoy the best in video performance while delivering digital audio over one simple connection cable.

DIAT™ Wireless Rear Speakers — By using an infrared audio transmission technology developed by Sony, you can now eliminate those ugly wires that ran from the front of the room to the rear speakers. DIAT (Digital Infrared Audio Transmission) technology is not susceptible to the radio interference that other transmission technologies can be affected by. Furthermore, DIAT technology was created for the transmission of audio signals and it ensures uncompressed sound quality.

S-Force® Pro Front surround sound — By using a powerful 100% digital Sony S-Master amplifier and DSP (Digital Signal Processing) technology, surround sound can be created from just two front speakers. Unlike other “virtual surround” technologies, all of the creation of the sound comes from the front two speakers and does not need to be bounced off of side walls. No matter what the size or shape of the room or what's on the wall, it's possible to hear sounds from behind you without needing to place speakers behind you. S-Force Pro is clean, easy, and gets you into the excitement!
