Transcribing Machine

features

- ▲ **Standard Cassette System** uses easy to obtain, easy to store standard cassettes for recording and playback convenience.
- ▲ **Compatible with Double Speed Recorders** enables the user to transcribe cassette tapes recorded at either the standard 4.8 cm/sec speed or half speed 2.4 cm/sec
- ▲ **Compatible with Stereo and Mono Cassette Recorders** allows cassette tapes recorded in either the monaural format or stereo format to be transcribed.
- ▲ **Telephone Record Capability** allows for direct recording of telephone conversations.
- **3-Digit Tape Counter** gives a visible indication of tape elapsed for rapid access when editing and shows amount of dictation on the tape.
- **Fully Adjustable Automatic Backspace** begins playback prior to where it last stopped, preventing lost dictation.
- **Built-In Erase on Rewind** may be optionally activated to automatically erase recordings while rewinding the cassette.
- **Cassette Window** enables the user to view and confirm tape movement.
- **Auto Motor Shut-Off** after approximately 3 minutes in Stop mode.
- **3-Function Foot Control** lets the transcriber change mode from Play to rewind to Fast Forward without removing hands from the keyboard.
- **Speed/Tone/Volume Controls** are individual slider-type, front mounted, and allow easy one-finger adjustment for transcribing convenience.
- **Electronic Indexing** stops at electronic signals on the tape at selected points to aid in locating particular recordings.
- **End of Tape and No-Cassette Alarms** signal when the tape end is reached, or if there is no cassette in the compartment.
- **Auto Stop** stops the tape in Fast Forward and Rewind modes when End-of-Document signals are reached.
- **Built-In Playback Speaker** is useful when one or more persons wish to listen to the recording without the need to wear earphones.
