## Key Features Of The Sony MZ-B3

- **Business MiniDisc player/recorder.** Stereo or mono recording with 74min (148min in mono) of available time.
- **Built-in stereo microphone and speaker.** The microphone provides excellent voice reproduction. Built-in speaker is very convenient for quick playback.
- **Digital voice-activated recording (VOR).** To conserve recording time, the MZ-B50 can be set to record only when audio is present. A memory buffer is also used to prevent the audio from being cut off.
- **Selectable limiter.** A switchable limiter is built-in for automatic adjustment of recording levels. This function produces "hands-free" recordings with consistent audio level.
- **High-speed playback.** This function makes it easy to quickly review recordings
- **Editing.** Features like erasing one or all tracks are quick and easy.
- **Instant Access.** Each MiniDisc can hold up to 255 tracks of information and recall any track with the press of a button.
- **Disc position indicator.** Shows which position on the disc is currently being used—ideal for a quick reference of time remaining on disc.
