The Vegas+DVD Production Studio provides all the great features of the Vegas 4.0 software, along with the added versatility of the DVD Architect™ application. This comprehensive authoring application adds an extensive set of professional tools for developing dynamic menu-based DVDs, music compilations, movies, and slideshow presentations. The DVD Architect software even lets you import Dolby® Digital AC-3 files to create powerful surround-sound DVDs. Use the Vegas 4.0 software's unlimited tracks and incredible flexibility for video editing, audio production, compositing, titling and advanced encoding. When the editing is complete, send the project to the DVD Architect application for authoring and encoding to DVD.
