## CCP-1100SF AUDIO CASSETTE DUPLICATOR

In keeping in the tradition of Sony's family of audio cassette duplicators, the CCP-1100SF Audio Cassette Duplicator offers an efficient and dependable solution for in-house audio cassette duplication needs by delivering high quality copies of an original cassette in a very short time.

The CCP-1100SF is a monaural, one master to one copy unit allowing for duplication at 16 times normal speed. Additionally, the CCP-1100SF is expandable. Using a master unit plus 10 expansion units, up to 41 simultaneous copies can be produced per run, enabling hundreds of copies to be made quickly.

The CCP-1100SF is an economical entry level, high-speed audio cassette duplicator system ideal for use in various applications including cassette ministries, corporate and government presentations, and education.
