

The MB-8N tuner base unit accommodates up to four WRU-8N tuner units, and it includes a built-in antenna divider making it easy to daisy-chain up to four of these base units to form a 16-channel system. The MB-8N excels in the level of remote operation and monitoring it provides. Over standard Ethernet connections, a complete system can be set up and controlled from a PC running the supplied GUI software. This includes the store and recall of different channel configurations, a feature that is particularly useful for location use and equipment rental organizations.

Sony's MB-8N Wireless Tuner Base

MB-8N • Suggested List Price \$2,900.00 ▼
