# An All-in-One Digital A/V Powered Mixer Providing an Effective Solution for Smooth Multimedia Presentations

Sony introduced the SRP-X700P Digital Powered Mixer, a new "all-in-one" system concept for multimedia presentations. Designed to function as the central control hub for the integration of video, audio and PC media sources, the SRP-X700P allows for rich content and multimedia presentation systems to be easily configured, without integrating several separate A/V presentation devices.

Expanding upon this concept, Sony is now introducing the SRP-X500P, a cost-effective and ideal choice for use in small to mid-scale presentation systems - for conference rooms, corporate boardrooms and classrooms to houses of worship. Within its compact chassis the SRP-X500P has seven major presentation devices - including an RGB/video switcher, audio mixer, wireless tuner slots, sound processor, and digital power amplifier. For smooth control over presentations there is an easy-to-use front-panel layout, providing instant access controls for compatible Sony VCRs, DVD players, projectors and PCs. Plus, the built-in digital mixer offers important DSP functions, including a feedback reducer and equalizer for high-quality audio.

Eliminating complicated operations, cumbersome installation procedures, and complex adjustments of A/V parameters for optimized visuals and sound, the SRP-X500P is an efficient A/V presentation system for conveying your messages as effectively as possible.

#### **FEATURES**

#### All-in-One Design

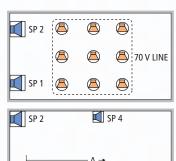

The SRP-X500P incorporates the functionality of seven presentation devices in a compact 3U high, 19-inch rack-mountable chassis, enabling modern presentations using a wide variety of AV sources. Compared to purchasing these devices separately, the SRP-X500P presents a large reduction in system cost and eliminates time-consuming wiring and adjustments between such devices.

#### **Nine System Presets**

Setting up audio parameters of a presentation system can be a difficult task, especially to deliver high-clarity audio to all areas of the venue. The SRP-X500P offers nine factory-default system settings in its memory, enabling more efficient audio adjustment. Speaker system configurations are also included in these settings, allowing quick setup of the audio system by recalling the one best suited for the venue.

#### **High-Quality Digital Sound**

The SRP-X500P is equipped with a number of digital signal sound processing functions including Auto Gain Control (AGC), equalizer, compressor and feedback reducer, helping to bring professional sound quality into multimedia presentations. Each microphone input channel integrates a digital feedback reduction function. At the touch of a button, the audio frequency in which feedback is likely to occur, is detected and suppressed, reducing unwanted microphone feedback.\* Consequently operators can raise the amplifier's volume without concern over microphone howling. The SRP-X500P also incorporates an A/D and D/A converter with a 24-bit, 48-kHz sampling frequency for high-quality digital sound. The four-channel digital amplifier also maximizes the sound quality of the SRP-X500P.

\* When a microphone position is changed, the feedback reduction function has to be set again.

#### **Integrated Wireless Tuner Unit Slots**

The SRP-X500P can accommodate two optional wireless tuner units, selectable from the

Sony UWP-X series or the WRU-806A/806B, making it simple to establish a high-quality wireless microphone system for the presentation.

#### **Comprehensive Remote Control**

For integrated control of the presentation system the SRP-X500P offers a variety of control interfaces - to control peripheral equipment or to be controlled from an external control system. These include RS-232C, Control S and PARALLEL ports.

An optional RM-AV3000 Series Wireless Remote Commander® also provides basic control functions for both the SRP-X500P and connected projector.

#### Remote Control of the SRP-X500P:

 RS-232C (REMOTE): Various settings of the SRP-X500P can be altered from a PC running the supplied SRP-X500P Manager. Third-party system controllers can also be connected to this port to control the SRP-X500P.

### Remote Control of Peripheral Equipment From the SRP-X500P

- RS-232C (PROJECTOR CONTROL): For remote control of Power ON/STANDBY and input selection of Sony projectors.
- Control S (PROJECTOR CONTROL): For remote control of Power ON/STANDBY and input selection of the Sony LCD Data Projector VPL-PX15.

## Remote Control of Peripheral Equipment From an External Parallel Interface Box

 PARALLEL (REMOTE): For remote control of peripheral devices such as video screens (up/down), window curtains (open/close), and lighting (on/off).

## Wireless Control of the SRP-X500P or Peripheral Equipments

Using the optional RM-AV3000 Series Remote Commander, frequently accessed operations of the SRP-X500P and connected projector can be wirelessly controlled:

#### SRP-X500P

- AV/RGB selection
- Master volume adjustment
- Master volume muting

#### Projector

• Projector Power ON/STANDBY

#### **Versatile Interfaces**

The SRP-X500P offers an array of video, PC, and audio I/Os. In addition to conventional composite and component video inputs, it supports computer RGB input and output, both of which accommodate up to SXGA resolution. As for audio, four microphone inputs and two stereo line inputs are available, each which can be freely assigned to the four audio outputs.

## **Built-in Four-Channel Digital Power Amplifier**

The SRP-X500P is equipped with a four-channel digital power amplifier that can be switched between high and low impedance modes to suit various room types.

#### Low impedance mode:

90 W + 90 W + 50 W + 50 W (4  $\Omega$ , 8  $\Omega$ )\* High impedance (70 V line) mode:

90 W + 90 W (4  $\Omega$ , 8  $\Omega$ )\* + 60 W (82  $\Omega$ )

\* The same power rating can be acquired for both 8  $\Omega$  and 4  $\Omega$  speaker impedance. Connect the speakers so

the total speaker impedance is 4  $\Omega$  or higher.

#### **PC Control With Easy-to-Use GUI**

For system setup and operation from a PC, the SRP-X500P is supplied with the Windows-based SRP-X500P Manager software.\* From its easy-to-use GUI, operators can control detailed settings such as the equalizer, AGC, and compressor, before the presentation.
