Combining network functionality with Pan/Tilt/Zoom (PTZ) capability, the SNC-RZ30N camera takes remote monitoring and general IT applications to the next step by offering the flexibility to see almost anything within the camera's range and field-of-view over an ordinary TCP/IP network. By simply using a popular web browser like Microsoft Internet Explorer® or Netscape Navigator®, images and the PTZ movement of the SNC-RZ30N camera can be controlled using a PC at any location and at any time without the need for any additional software or plug-ins. In addition, installation and operation of the SNC-RZ30N camera is easy thanks to its browser based set-up menu and user-friendly GUI (Graphic User Interface).

SONY®
