

The DSR-11 Dual Standard Compact Recorder has a long list of features designed for professional videographers all over the world! The DSR-11 DVCAM™ recorder is aimed specifically at computer-based non-linear editing applications. This professional VTR is both evolutionary and revolutionary, equipped with key standard features such as an i.LINK®* IEEE-1394 DV based I/O connection, multi-voltage operation, and for the first time in a VTR at this level, both NTSC and PAL playback and recording capability. The DSR-11 can record and playback in either DVCAM or consumer DV formats, will accommodate both standard and mini-size DVCAM and DV cassettes, and can be operated in either vertical or horizontal positions for added layout flexibility.
