

Sony is pleased to introduce the DSR-DR1000 DVCAM™ HDD Video Disk Recorder. The DSR-DR1000 is a DVCAM format stream based, hard disk recorder that brings new production and system application capabilities to the DVCAM family. This half rack unit incorporates a large capacity hard disk drive to provide up to six hours of DVCAM format stream recording. Primarily designed for recording and edit feeding applications, the DSR-DR1000 takes full advantage of the benefits of disk based recording, while maintaining the same operational feel as a VTR. It supports both AV/C and SBP2 i.LINK®\* interface protocols. In addition, the DSR-DR1000 is the first DVCAM product with a standard Ethernet connection, enabling FTP file transfer capability.
