

The DXC-D50/D50WS is the next-generation in the DXC-series of cameras, designed for even greater picture quality and operational convenience. These cameras are offered in two different versions: the DXC-D50H and L are 4:3 models and DXC-D50WS 16:9/4:3-switchable model. Both feature the new high-performance Power HAD™ EX CCD sensor and precise 12-bit A/D conversion built into a highly sophisticated LSI. The result is superior picture quality, high sensitivity, plus low noise and smear characteristics over previous DXC models. A variety of automatic functions have also been included, allowing easy and convenient operation in any shooting scenario.

Sony Introduces the DXC-D50 3CCD Portable Camera
