

Sony's new LUMA™ monitors are designed for production applications where normal technical viewing is required, but where a CRT monitor is not practical. The new multi-format, widescreen monitors include the LMD-170WS and LMD-230WS, 17" and 23" Displays (viewable area, measured diagonally) which feature a unique two-piece design. The separate multi-format engine houses the video processing, input connections, option slots, controls and power supply. The LCD panel and tally light are mounted in the display cabinet, providing a light-weight design that allows greater installation flexibility than a CRT monitor.

These professional LCD monitors are optimized to handle moving video and can accommodate a wide variety of standard and high-definition analog and digital signals.

Sony introduces LUMA Professional LCD Monitors

LMD-170WS • Suggested List Price \$3,200.00 ▼

Key Features

- High brightness, high contrast WXGA LCD panels
- Natural color and gray scale reproduction
- Frame to frame accuracy achieved with new processing technology
- Wide viewing angle of 170°, both horizontally and vertically
- Accepts a wide range of analog and digital signals including 1080/60i, 720/60P, 1080/24PsF
- Includes one computer input that accepts input signals from VGA to SXGA
- Optional input cards available for SDI, HDSDI/SDI combination or DV signals
- Standard mounting - the multi-format engine can be mounted in 1RU; the LMD-170WS panel can be mounted in 7RU with an optional mounting bracket
- Both the LMD-170WS and LMD-230WS panels incorporate a standard 75mm VESA bolt pattern - many after-market vendors can supply arms and mounts that are VESA compliant
- LCD Panel can be extended as far as 10 meters from the multi-format engine
- Optional table stand for desktop applications
- Incorporates production monitor features and functions such as 3 color tally, blue only mode, cross pulse, underscan, safe area markers, H/V Delay and DC operation

LMD-230WS • Suggested List Price \$3,950.00 ▼
