

Sony's new LUMA™ monitors are designed to meet the growing demand for compact and lightweight multiple viewing displays.

The series consists of three models: a quadruple 4", a triple 5.6" and a dual 7" widescreen (viewable area, measured diagonally) – all utilizing high brightness, high contrast LCD panels. NTSC composite input is standard and an optional SDI module can be added per monitor at any time.

These monitors are ideal for use in a wide range of professional applications in the studio or in an OB vehicle where display depth, weight, and power consumption are critical.

Sony introduces LUMA Professional LCD Monitors

Key Features

- The high brightness, high contrast LCD panels allow use under various lighting conditions
- Monitors accept NTSC or PAL, using automatic detection
- Monitors accept SDI with the BKM-320D, optional input adaptor. The module can be added per monitor at any time as system requirements demand
- Compact size - the LMD-440 can be mounted in 2RU, the LMD-530 and LMD-720W can be mounted in 3RU
- All monitors can easily tilt up or down to optimize viewing angle
- The vertical arrangement of the controls allows easy operation, even when the monitor is tilted
- Low power consumption. LMD-440 - 18 W, LMD-530 and LMD-720W - 22 W
- Three color tally - the tally function can be operated using the parallel remote function
- AC/DC Operation
- LMD-720W only - choose between 4:3 or 16:9 to accommodate the video source

Key Applications

- Simple, multiple monitor sets for confidence monitoring
- OB vehicles, Studio Monitoring
- Perfect when space is at a premium
