

The series consists of three models – a 19", 13", and 8" (viewable areas, measured diagonally) using Sony Trinitron® CRTs. The option slot in the rear panel can provide SDI, SDTI-CP, additional analog component inputs and i.LINK®* connectivity, using input cards from the PVM-L5 and BVM D series of monitors. The L2 series was designed to provide greater performance and input flexibility than the M2 series, and still maintain a cost effective solution for a variety of picture monitoring and production applications.

Sony's PVM L Series Monitors

Key Features

- All models in the series use Trinitron CRT's for clear and precise images. PVM-20L2 and PVM-14L2 incorporate a 600 TVL CRT; PVM-9L2 incorporates a 250 TVL CRT.
- One doublewide option slot is provided for simple and flexible configurations, using option cards from Sony's PVM-L5 series and BVM D series monitors. With an optional adaptor inserted into the rear panel, the L2 series monitors can accept direct input from a wide variety of signal formats.
- The PVM-20L2 and PVM-14L2 are equipped with input connectors for analog component (Y/R-Y/B-Y), RGB, Y/C and composite signals. PVM-9L2 is not equipped with standard component input, but the BKM-129X can be added as an option.
- PVM-L2 series monitors accept PAL and NTSC composite signals using automatic detection.
- PVM-L2 series monitors utilize a digital comb filter for clear and highly detailed images.
- 4:3/16:9 switching capability; Blue only; Underscan; Switchable color temperature; and Auto/Manual degauss functions are provided in the series.
- The window-type OSD makes monitor adjustment and operation easy. Available in six languages.
- In addition to operating from an AC power source, the PVM-9L2 can be operated using optional BP L series batteries. The PVM-9L2 is also equipped with a carry handle.

Key Applications

- Mid-range Production Monitor
- OB vehicles, Studio Monitoring
- Editing, Field Production

Key Competitors and Pricing

JVC and Panasonic have mid-range production monitors
