

Superb brightness of 1800 ANSI lumens

The VPL-CS7 continues to accomplish best-in-class brightness.

The VPL-CS7 adopts Sony original virtual light system with the all-new super high aperture liquid crystal panel and newly developed bright 165W UHP lamp. The all-new elliptical reflector with ultra smooth surface combined with a concave lens enables very small light source and accomplish very high light collection efficiency. This provides the audience with a clear, crisp and bright image every time.

Intelligent Auto Setup

Just turn on the power and the following sophisticated functions are initiated.

Powered lens protector: When power is switched on, the powered lens protector opens automatically. You will never waste time looking for a missing lens cover - it is always safe on the projector.

Powered tilt adjuster and Auto Keystone Correction: A power operated tilt adjuster sets the projector's shooting angle, and keystone distortion is automatically corrected according to the tilt angle. The tilt angle is adjustable from the remote control unit and the new setting retained in memory. Keystone distortion can be corrected up to a projector tilt angle of 15 degrees by the remote control unit. This means that images can be projected with the correct geometry even where installation space is limited. The previous setting of each function is held in memory and recalled automatically. Emergency Manual Set Up is also available.

Smart APA (Auto Pixel Alignment)

No need to adjust your PC computer or VPL-CS7 for optimum picture performance, the Smart APA function ensures that the display is automatically sized and adjusted for optimum picture performance whatever the input signal.

New, innovative style and portable

Sony continues to develop innovative design and the VPL-CS7 is no exception!

The VPL-CS7 sets new standards in visual styling with its simple and elegant external design. With just the buttons most commonly used located on a sleek top panel, the VPL-CS7 overall appearance is flat and smooth, making it both attractive and easy to carry. Other buttons and the connectors are concealed behind a cover when they are not being used, adding to the smart appearance.

The VPL-CS7 is light, only weighing 2.9 kg (6 lb 3 oz).

Quiet Operation

Why compete with the projector for customers attention.

Sony's ultra compact SuperLite® projector meet the demands of the user on the go with their compact, light weight solutions and have one of the best price to performance ratios in the market today. The VPL-CS7 specifications are unmatched in the 0.62-inch TFT LCD Ultra Compact marketplace and meet the demands of any boardroom application.
