

As a direct successor to the DXC-950 camera, the DXC-990 is a 1/2 type DSP 3CCD color video camera which incorporates Exwave HAD™ technology – the Sony technology that greatly improves camera sensitivity (F11 @2000 lx) while reducing smear compared to previous CCD technologies. With its bayonet mount for maximum lens flexibility and its high sensitivity, the DXC-990 is the perfect choice for any video application where picture accuracy, detail, and space considerations are essential.

Sony's DXC-990 3CCD Color Image Capture Video Camera
