The Sony NSP-100 (Network Storage Player) receives video, audio, graphic, and text content via an IP Network; stores it on its internal hard disk drive; and later displays that content according to either a pre-defined playlist, or under local control. The NSP-100 can be used for digital signage, corporate communication, training, and content review/approve applications. The BZNP-100PLUS software is required to ingest, format, and schedule content, as well as distribute that content and monitor the operation of the NSP-100s and the network.

SONY

Sony's NSP-100 Network Storage Player

NSP-100 • Suggested List Price $1,995.00 ▼
