PJNET!
NETWORK PROJECTOR MANAGEMENT SOFTWARE

Centralized monitoring, diagnostics and control for select Sony LCD business projectors.

PJNet! lets you centralize your AV/IT support resources while saving your company time and money by remotely monitoring and diagnosing any projector issues. Fix projector problems quickly by having PJNET! software e-mail or page the appropriate personnel.

PJNet! software is ideal for installations with multiple projectors installed in various locations throughout your company or campus.

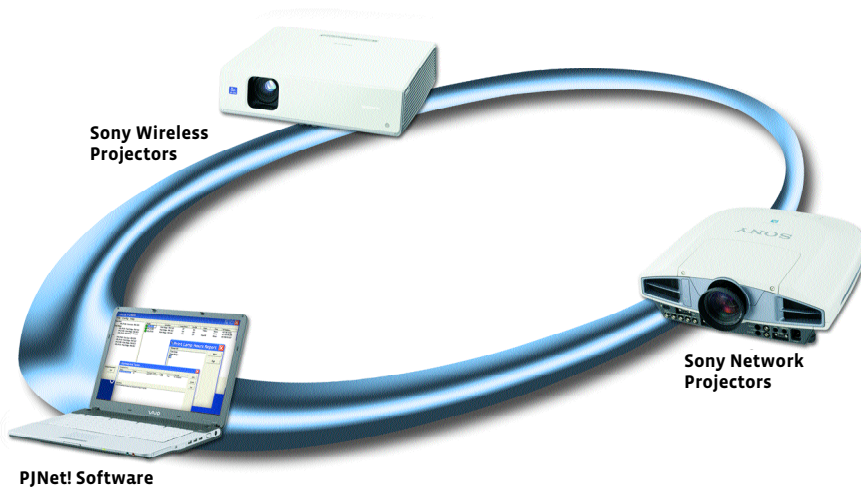

PJNet! Software
Remotely monitor, diagnose, troubleshoot, email alerts and control select Sony network projectors.

Sony Wireless Projectors

Sony Network Projectors

Increase User Satisfaction, AND Save Time and Money!

Have projector problems resolved by a simple phone call. Wrong input? Picture inverted? No problem! Instead of dispatching an AV/IT technician on foot to the projector, you can control the projector as if you were standing right next to it!

Proactive Versus Reactive

Why wait to find a problem? Don't let the user discover the error, monitor projector status and have an e-mail or page sent to the appropriate personnel the second an error occurs! Reduce down time by having an e-mail sent with the specific projector and lamp model number before the lamp hour rating has been exceeded. Automatic reminders to have filters cleaned will ensure the longevity of your Sony network or wireless projector!

Watchdog Security

Is projector theft an issue? If a projector is disconnected from the network, PJNet! software will send an e-mail or page to security, indicating the model number, location and time of occurrence.

PJNet! Software Supports the Following Sony Network Projectors:

- VPL-PX15 • VPL-PX35 • VPL-PX40 • VPL-FX50 • VPL-FX51
- VPL-PX41 • VPL-FX52 • VPL-FX52L

And Sony Wireless Projectors:

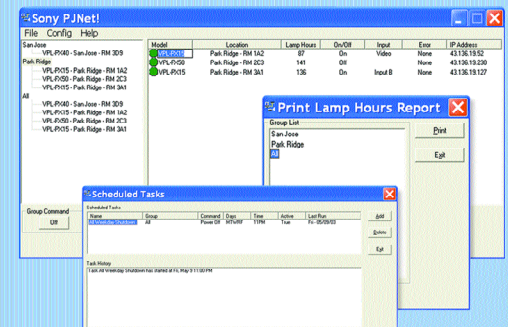

- VPL-CX76 • VPL-CX86

Minimum System Requirements – Operating System: Windows®98, Me, NT, 2000 or XP
CPU: 200MHz, Memory: 64MB Display Resolution: XGA Mouse Keyboard

For more information, please refer to www.sony.com/projectors or contact your Sony Account Manager.

Features

- Remotely monitor, diagnose, troubleshoot and control up to 255 Sony network projectors including select Sony wireless projectors.
- Send e-mails or pages based on:
 - Projector warnings or error
 - Filter cleaning reminder
 - Lamp hour usage
 - No response (great for security!)
- Set scheduled tasks to power on/off projectors based on date and time
- Print projector lamp hour usage reports
- Secure connection
- Detect projectors automatically
- Access projector web pages easily
- Runs on Windows® Operating System Computers - from anywhere you can connect to your network.
