#### FAQ

- 1) Does the NS7 have the ability to play back WM9HD?  
Yes.
- 2) Will the NS7 play back h.264 HD  
No. Although this is possible and maybe introduced later.
- 3) How long can it play without stopping?  
The maximum length of a video continuous video is 30mins per file. Although since the NS7 can switch between two video files within one frame, it will be possible to make a continuous video output.
- 4) RS232 control of the projector?  
Yes. The NS7 has two RS232 control ports.
- 5) Can a user have control from central location?  
The NS7 has control over projectors and display devices, general scheduling, and NS7 management.
- 6) Can a user update storage of content from central location?  
Yes. Content can be sent from the Central management PC to the NS7.
